ABOUT ME

Senior Web Engineer and **CTO** with strong expertise in secure backend systems, RESTful APIs, and scalable web architecture. Experienced in leading teams, modernizing legacy platforms, and building production-ready solutions aligned with business goals.

WORK EXPERIENCE

CTO AND CO-FOUNDER – GUIDEASY GLOBAL LIMITED – 01/11/2023 – Current – DHAKA, BANGLADESH

Business or Sector: Accommodation and food service activities | **Department:** Software Development |
Email: rahel@guideasy.com | **Website:** www.guideasy.com

As CTO and Co-Founder, I lead the company's overall technical vision, architecture, and product development strategy. I am responsible for building scalable, secure, and high-performance platforms that support Guideasy's tours and travel ecosystem.

- Define and execute the technical roadmap aligned with business goals and long-term scalability.
- Architect and develop full-stack web applications using **Laravel, Livewire, Nuxt.js, MySQL, and Tailwind CSS**.
- Design and implement **secure RESTful APIs**, enabling seamless integration with internal systems and third-party services.
- Establish coding standards, reusable libraries, and best practices to ensure maintainability and rapid future development.
- Build and oversee a **custom CMS** for managing tours, vendors, clients, and operational workflows.
- Collaborate with product, UX, and business stakeholders to translate requirements into robust technical solutions.
- Implement QA processes, testing strategies, and performance monitoring to ensure system reliability and security.
- Mentor developers and guide architectural decisions to maintain code quality and engineering excellence.

SENIOR WEB DEVELOPER – DAINIK AMADER SHOMOY – 01/12/2022 – 30/10/2023 – DHAKA, BANGLADESH

Business or Sector: Other service activities | **Department:** IT and Software Development |
Email: info@dainikamadershomoy.com | **Website:** www.dainikamadershomoy.com

As a Senior Web Developer, I am responsible for modernizing legacy systems, strengthening application security, and developing scalable backend solutions for a high-traffic national news platform.

- Lead the migration of legacy applications to modern, secure frameworks, improving performance and resilience.
- Design, develop, and maintain **secure RESTful APIs** with proper authentication and authorization mechanisms.
- Implement reusable, security-focused code libraries following industry best practices and secure coding standards.
- Conduct code reviews, vulnerability assessments, and security audits to identify and mitigate risks.
- Embed security features during application design to ensure compliance with modern security standards.
- Oversee deployment, system monitoring, maintenance, and upgrades to ensure high availability and data protection.
- Work closely with editorial, design, and infrastructure teams to align technology with operational needs.

SENIOR WEB DEVELOPER – DAILY JUGANTOR – 01/11/2021 – 30/11/2022 – DHAKA, BANGLADESH

In this role, I contributed to the development of a secure and scalable digital news infrastructure, supporting editorial operations and high-volume content publishing.

- Develop and maintain **secure RESTful APIs** for reliable data exchange across internal systems.
- Design and implement reusable backend components for a custom **Content Management System (CMS)**.
- Collaborate with developers, UX designers, business analysts, and system administrators to deliver user-centric solutions.
- Research, design, and manage software components with a focus on scalability, maintainability, and security.
- Integrate new system features while ensuring robustness, performance optimization, and data protection.
- Support deployment, maintenance, and continuous system upgrades to ensure uninterrupted service.
- Provide technical guidance and training to internal teams on system usage and best practices.

WEB APPLICATION DEVELOPER – IGONET IT – 01/08/2018 – 30/10/2021 – VILLNUS, LITHUANIA

As a Web Application Developer, I worked across the full software development lifecycle, contributing to both frontend and backend systems while gradually taking on leadership responsibilities.

- Develop and maintain web applications using **Vue.js, Vuex, Nuxt.js**, and modern backend technologies.
- Build **server-side rendered SPAs** to enhance performance, SEO, and user experience.
- Participate in requirement analysis, system design, development, testing, and deployment.
- Write clean, maintainable, and scalable code following best development practices.
- Troubleshoot complex technical issues and optimize application performance.
- Lead and mentor a small development team for over one year, ensuring timely project delivery.
- Modernize legacy systems by introducing new technologies and improving security and performance.
- Collaborate closely with frontend designers and backend engineers to ensure seamless integration.
- Continuously research emerging technologies and develop reusable components for long-term scalability.

EDUCATION AND TRAINING

01/01/1999 – 26/05/2009 Noakhali , Bangladesh

SECONDARY SCHOOL CERTIFICATE Sukhchar Mofizia High School

Field of study Science | **Final grade** 5.00/5.00 | **Level in EQF** EQF level 2

01/09/2009 – 30/10/2013 Rangamati , Bangladesh

DIPLOMA IN ELECTRICAL ENGINEERING Bangladesh Sweden Polytechnic Institute

Field of study Electrical Engineering | **Final grade** 3.49/4.00 | **Level in EQF** EQF level 5

03/05/2015 – 14/01/2021 Dhaka, Bangladesh

BACHELOR IN COMPUTER SCIENCE AND ENGINEERING International University of Business Agriculture and Technology

Website <https://iubat.edu/> | **Field of study** Computer Science and Engineering | **Final grade** 3.46/4.00 |

Level in EQF EQF level 6

LANGUAGE SKILLS

Mother tongue(s): **BENGALI**

Other language(s): **ENGLISH**

SKILLS

debug software | Web technologies: J2EE, RESTful Services, HTTP, SOAP | use software design patterns | develop software prototype | computer programming | PHP | JavaScript | MySQL | SQL | Laravel, Livewire, Tailwind CSS, Vuex, Nuxt.js | analyse software specifications | web programming | implement front-end website design | use software libraries | web based collaborative platforms | CI/CD, Docker, Linux, Servers(Nginx, Apache) | Advanced System Design | message queues
